

## Questions for Hot & Spicy Session at EHSP Symposium 2016

How do you track the Lone Worker?

Can companies talk about how they are addressing the new OSHA record keeping?

- Ant-retaliation
- Notification
- Data Submission

Can companies talk about Temporary Worker Training?

Are there any suggestions for extension ladder safety?

Do you require your contractors to pre-qualify through a third party before working for your company? If so, do you have parameters for the contractors you require to go through this process (i.e. type of work they do, annual spending, etc.)

How many companies are currently using 3<sup>rd</sup> party auditors such as Avetta, Browse or ISN Network?

Site safety Audit Data Collection-do you use a mobile app, and if so, what is it?

How many Telecoms maintain underground storage tanks (UST) compliance using an outside, third party contractor for monthly designated operator (DO) inspections vs. having in-house staff (network techs, etc.) perform these inspections?

How do other companies manage "spills"? These spills can be from leaking batteries, ASTs as a result of car or truck accident. Do other companies have a dedicated group of staff to manage these incidents? Does this responsibility rotate between staff?

Do companies still require documented D.O.T. Driver vehicle inspections reports with no deficiencies found in an inspection?

Are telcomm companies working together to standardize RF signage placement along with type or signage to prevent confusion by workers when entering a site with multiple carriers?

Putting equipment in abandoned buildings can present issues for contractors to have access to it. Are your EHS teams aware that this happens?

What vendor is your company using for Right of Way (Railroads) training?

Is DC Arc flash training required for Central Office work? Where can we find this training?

Effective training techniques for a geographically spread out crew (standardization but also site-specific)

Are any companies concerned with the new executive order "Fair Pay and Safe Workplace?"

At AT&T, we are using drones to inspect cell towers.

1. What companies are using drones to inspect towers?
2. For those companies, are you using company employees and if so, what controls do you have?
  - Training
  - Hands-on experience
  - Certification

Any small cell information/applications?

EPA proposal for final rule- RE: Hazardous substances to same requirements as oil (SPCC, CWA)

Sustainability

- 1.) The evolving role of the EHS professional-tools needed to be effective
- 2.) Incident management-enforce best practices
- 3.) Any good effective near miss program
